

ELECTRIC POWER SYSTEM CONVERSION

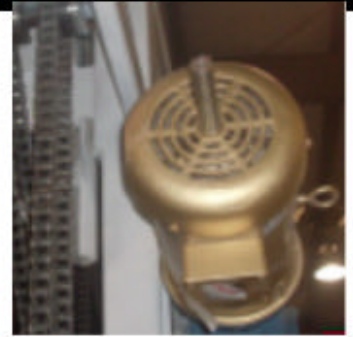

- **Convert Palletizer Hydraulic Drive System to an All Electric Drive System.**
- **Potential to cut Power Consumption in HALF!**

- Hydraulic systems run about 9,200 watts on average. Electric upgrades run about 4,600 watts on average.
- High Energy Efficient Motors.
- Machine will perform faster, with more control.

- No leaks to fix.
- No expensive oil to change out.
- Environmentally friendly.
- Reduce your carbon footprint!
- Less abuse on assemblies.

- **No major mainframe modification required!**
- **Works with existing machine configuration.**
- **Uses same figure 8 wrap as existing hydraulic elevator.**
 - **Works with 48 X 40 and 36 X 36 pallet size.**

****Saves energy in individual tests,
results may vary depending on conditions and voltage.**
